

ECO-DESIGNED REFILLABLE PACKAGING SOLUTION

Eclipse offers an effortless replacement and recycling experience, it's ideal for a wide variety of beauty and well-being products.

BEAUTY & CARE

TWIST & LOCK

Innovative incorporated packaging with a simple twist and lock mechanism* using clear markers to guide the user.

1

- Twist anti-clockwise to separate the plastic cup from the glass jar

Take out the old capsule ●

2

3

- Place the new capsule into the top of the jar

Lock into place by **rotating clockwise** until you hear the satisfying "click" sound ●

4

WHAT MAKES ECLIPSE SPECIAL?

As one of our stock molds, Eclipse is a bespoke full packaging solution, with recycling possibilities that optimize the consumer's re-fill experience.

EFFORTLESS REPLACEMENT

Thanks to the unique twist and lock system, the inner plastic capsule can be easily loosened and secured to the glass jar without any adhesive or need for tools. This smart and innovative incorporated design enables end users to replace and refill the capsule effortlessly.

UTMOST SUSTAINABILITY

Made of glass and polypropylene (PP), Eclipse is fully recyclable. Its refillable nature allows consumers to reuse the glass jar with a new product-filled capsule, which helps to cut down on single-use packaging, and reduces their environmental footprint. With Eclipse, brands can share the sustainability principles while empowering consumers to engage actively in the circular re-use economy.

FULL PACKAGING SOLUTION

Developed as a stock mold, with a glass jar that comes in two shape options, Eclipse provides a full packaging solution. For brands, it helps to save significant time in development and accelerate the launch of their product.

UNLIMITED CUSTOMIZATION

We offer a wide range of customization options for Eclipse such as lacquering, frosting, silk printing, hot stamping and many more. The patented twist and lock system can also be applied to custom made products to satisfy your needs. Come and create your unique Eclipse with your most daring ideas.
